Joe : talked w/ SZody today and he has little authority to regulate on private property; they investigate complaints based on the Nat. Rifle Assoc.'s target range guidelines wh/ would have standards for things like noise.

Hi Greg,

Yesterday I spoke with Mike Szuch, Mr. Roder's neighbor to the east, who's trying to get a wildlife marsh established for hunting purposes. He's been upset by the amount of shooting at the target range Mr. Roder constructed for the security guards at the Davis Bessie plant (First Energy) on the unauthorized fill.

Mr. Szuch spoke with Scott Zody, the Chief of the Ohio Department of Natural Resources Division of Wildlife in Columbus, and Mike said Mr. Zody is very interested in the situation, because the amount and duration of firing, together with the times and dates of the firing, appear to be outside the limits of what are typically permitted for a target range, especially one near wildlife management areas. Mr. Zody was made aware of the federal case on the target range, and before proceeding with any action, would like to coordinate with you.

Mr. Szuch did not have his phone number, but he can probably be reached at their central number (1-800-945-3543). Alternatively, Mr. Szuch provided me the number for the local ODNR Div. of Wildlife contact: Gino Barnum (419-625-8062).

Thanks, and have a great Christmas Holiday.

Joe K.
